PROFILE

Am Vishnu Narayanan, currently doing my M.sc Game technology final year. am interested in game development, am a beginner in bring life to games using programming language and tool. also a photographer who loves to capture nature and wildlife and to freeze each moments

ACHIVEMENTS

Game Jam

A Game Jam conducted by Nostra, were we created a 2D arrow shooting game in unity engine. As in development perspective, i created the basic left right movement mechanics and Arrow shooting logic

Personal Project (Baisc 2D game)

My first 2D side scroll game with the help of my staff members. In this i learn about the unity engine and its compatibility, how to use the tools and apply values. How to make prefabs, drag and drop, animation controller, and the main scripting with C#.

Major project

Its a team project were we choose to make a VR game that can be played by all. In this Vr game we started to make a mountain climb (Reach to end) as the core game-play. I learn to use unity's Xr management and its options. Mechanics like Grab using grab interaction, setting up the colliders and using ui for better understanding
